

**MAGIC
COLOR
SCRATCH**

Tools

- ❖ Crayons (All Colors!)
- ❖ Oil Pastels (Optional)
- ❖ Multiple Black Crayons
- ❖ Toothpicks
- ❖ White Paper or Canvas

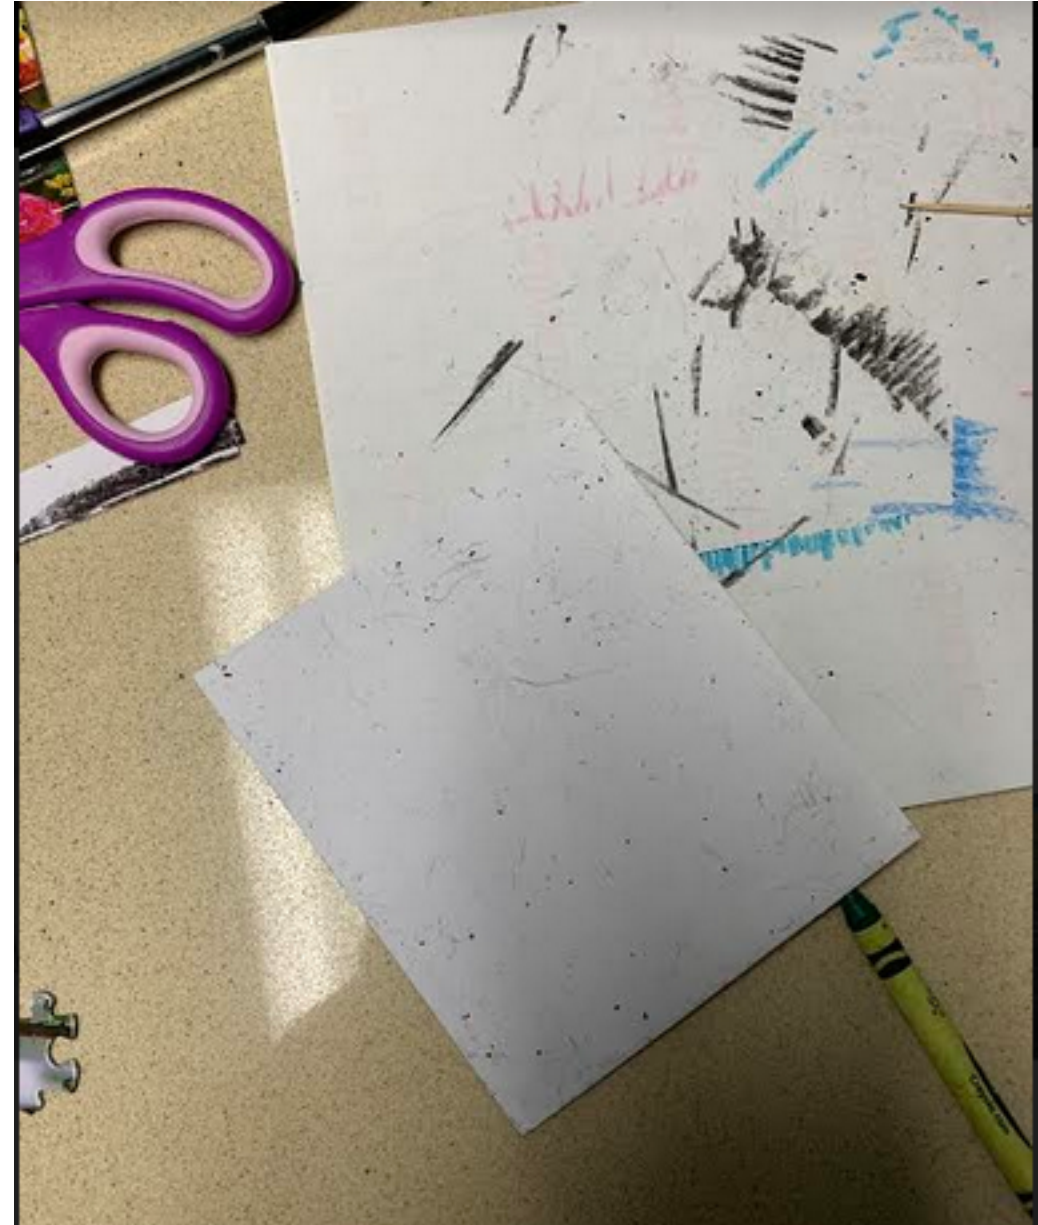

Step 1:

Take a piece of paper and color all over it with different colored crayons or oil pastels.

Make sure that every inch of the paper is totally covered in color! Whatever you leave white will show up white when you scratch away the color!

The more colorful you make it, the more colorful it will look once you scratch.

You can make a pattern, color different places different colors, or just make a mix of colors everywhere for a rainbow effect.

Step 2:

Once your entire paper is covered with color, take a black crayon and color all over all of the colorful drawing.

You may need to use a few different black crayons. Make sure the entire paper is now black. The darker black you color, the brighter the color underneath will show up.

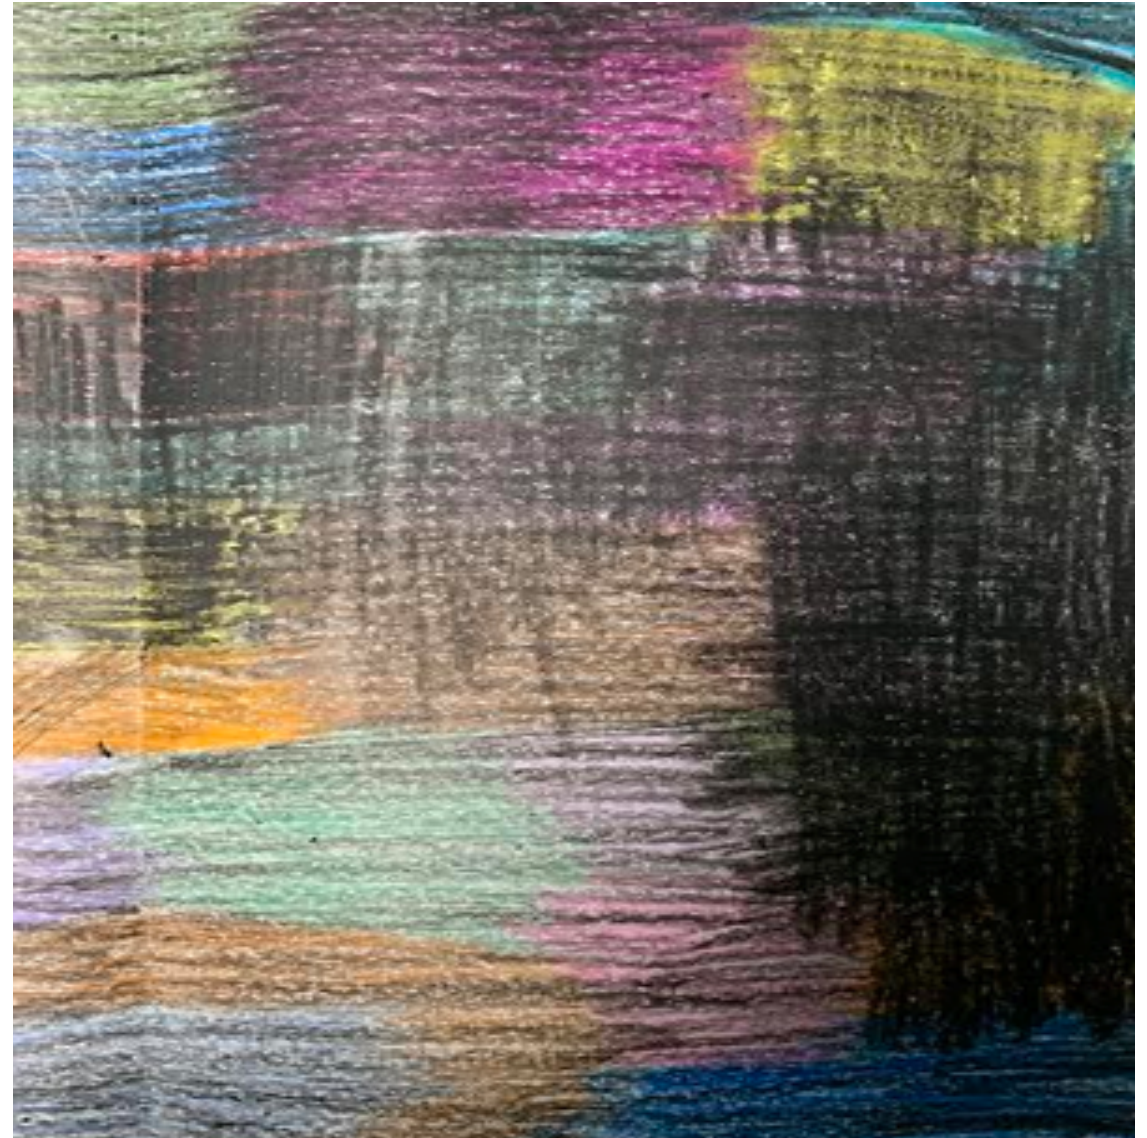

Step 3:

Once your entire paper is covered with black crayon color, take a toothpick and begin to draw on your paper.

Use the tip of the toothpick to draw whatever you want on the picture.

As you draw, the color from underneath will begin to pop up from where the toothpick scratched away at the black crayon.

Let's see your masterpiece! 😊
