Superhero Cape

Tools

T-shirt (Any Color)

Felt (Any Color)

Fabric Glue

Scissors

Step 1:

Find a t-shirt that you want to cut. It has to have a circle neckline for it to work as a cape. It can be any color, since this cape is yours for your superhero!

Using the picture instructions from EastCoastMommyBlog.blogspot.com on the next few slides, cut the shirt into a cape shape!

Step 2:

Take the shirt you've picked out and lay it on a flat surface – like the floor.

Make sure that it is totally flat and you've pushed out the arms and you can see the entire shirt.

This way, when you're cutting, you don't mess up and cut something off that was meant to be there because you didn't see it.

Step 3:

Using sharp scissors, carefully cut off both arm holes of the shirt.

You want to be left with a sleeveless t-shirt now.

If you used a long sleeved shirt, it will work the same, but you will just have longer arm holes to throw out after.

Step 4:

From each arm hole, cut down toward the hem of the shirt.

Do this to both sides so you have one long slit on both sides of the shirt.

Fold open the shirt and lay it out so that both sides are flapped flat on the floor and you can continue cutting without cutting off a piece you need.

Step 5:

You have to cut off one of the flaps now, but it doesn't matter which one you cut off.

It makes more sense though to cut off the side with the tag on it so it's not left on the shirt and itching you.

Cutting from near the neckline, cut in the half circle shape and cut off one flap until you're left with half a shirt attached to the neckline.

Step 6:

Take the colorful felt and trace out either the first letter of your name or the first letter of your superhero's name.

Cut this letter out and any other shape you want to put on your cape.

Using the fabric glue, glue the letter and shape onto the cape. Let this dry totally before you use your cape.

Step 7:

Decorate your cape with any other decorations you want on it.

Remember – it's your superhero cape – so you make it look however you want!

Once you're done decorating, let it dry completely.

Let's see your masterpiece! ☺
