

BUBBLE WANDS

Tools

Sugar

Dish Soap

Water

Large Bowl

Pipe Cleaners

Pony Beads

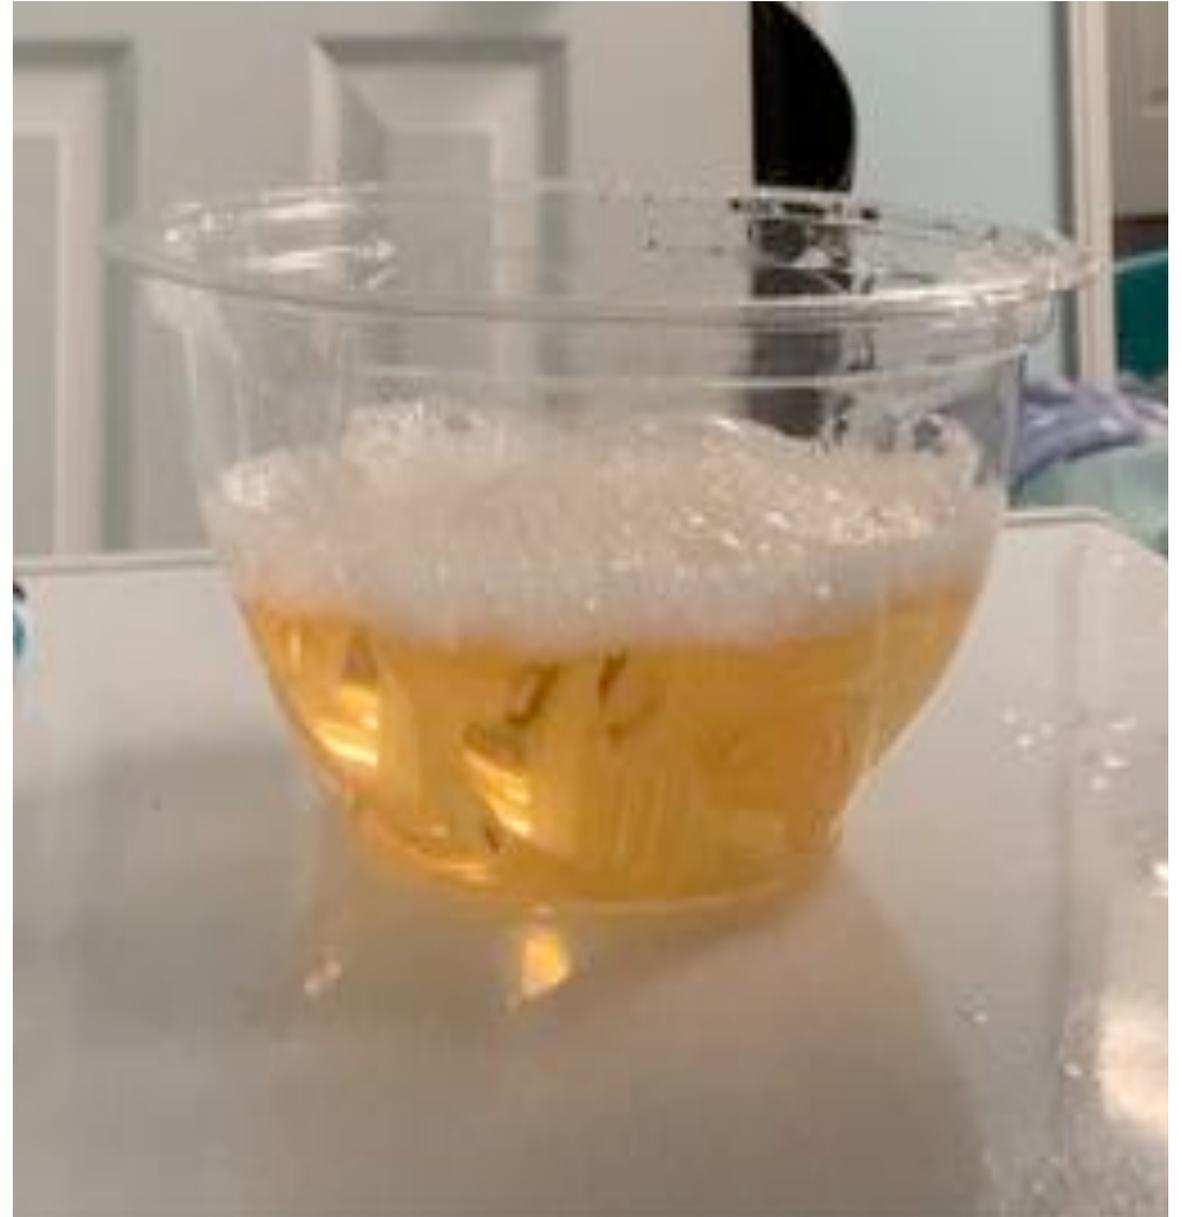

Step 1:

Let's make the homemade bubble solution. If you have bubble solution at home, you can skip this step!

In a large bowl, pour in $\frac{1}{2}$ cup of dish soap and $1 \frac{1}{2}$ cups of water. Pour slowly so it doesn't splash everywhere.

Add in 2 teaspoons of white sugar and gently stir it. Now you have bubble solution!

Step 2:

First you have to decide what shape you want your bubble wand to be.

The shape is the part you are dipping into the bubble solution.

Take a pipe cleaner – whatever color you want it to be – and bend one of the ends into the shape or letter you chose. Do this for every bubble wand you want to make.

Step 3:

Add 2 beads right after the shape to hold it in place.

Now add on beads for the holding part of the bubble wand. Use whatever color beads you want – one color, lot of shapes and colors, or make a pattern.

You can even write your name with beads if you're making wands for a few people.

Step 4:

Once you're done adding on all of the beads, make sure there's a little bit of space at the end with no beads, about 1/8".

Bend this extra space over into itself so the beads don't fall off.

Make sure to close all of the bubble wands so they are all ready to be used.

**Let's see your
masterpiece! 😊**
