MAGIC MAGNIFYER

Ingredients

❖Large Ziploc Bag

❖White Paper
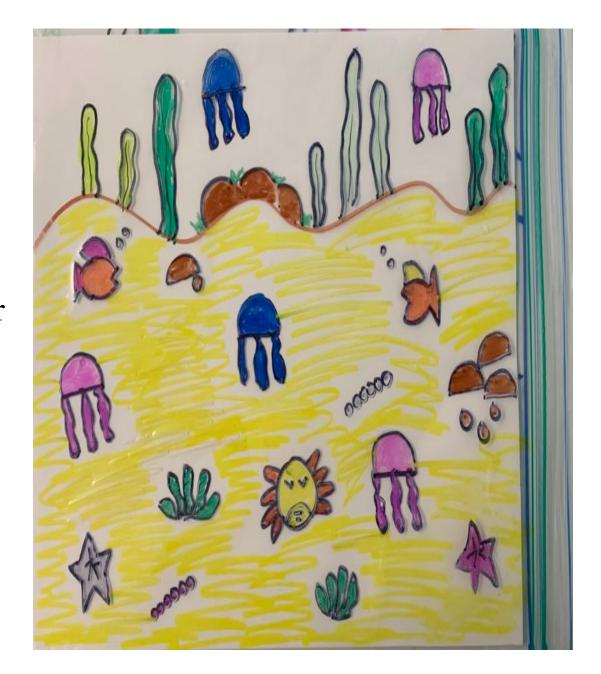

❖Black Paper

❖Black Sharpie

❖Colorful Sharpies

Step 1:

Take a gallon size Ziploc bag and put a white piece of paper inside of it.

On top of the bag, begin to draw an Under the Sea scene. Make an ocean, with sea creatures and seaweed – wherever your imagination takes you.

When you're done, swap out the white paper for a black paper and close the Ziploc bag so it doesn't fall out.
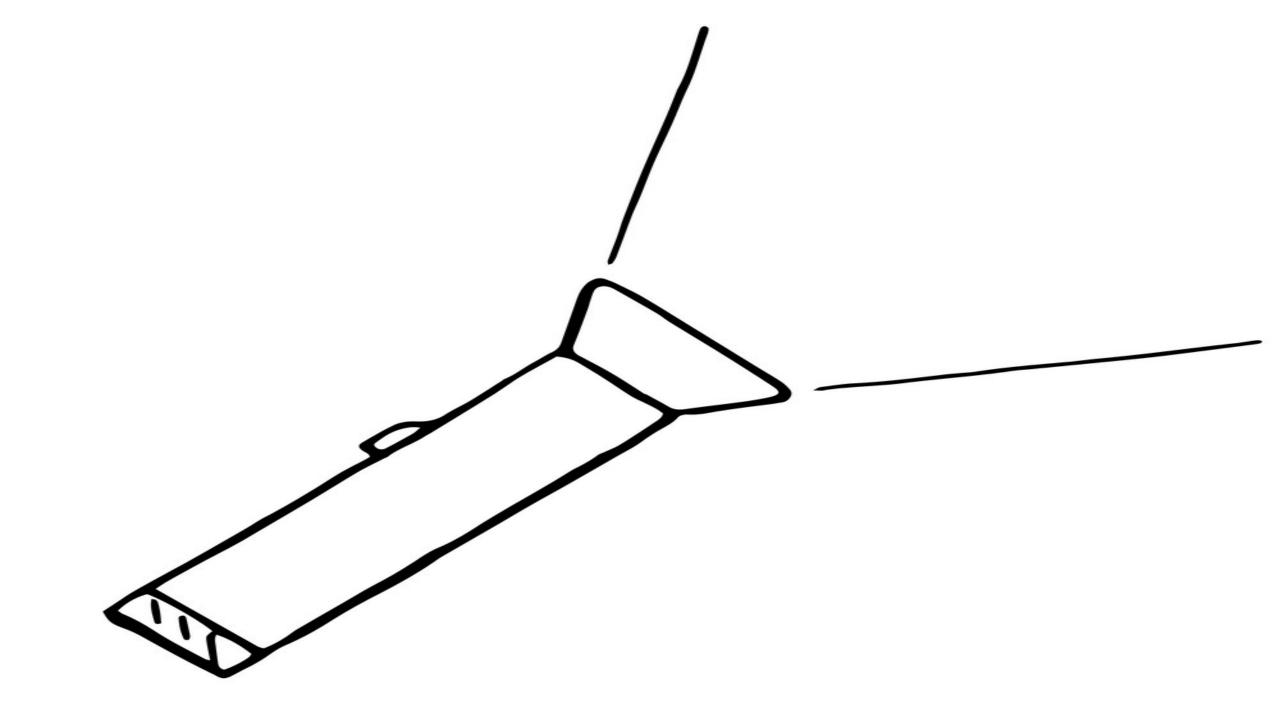

Step 2:

Print out this picture of a flashlight that's on the next slide.

Once it's printed, cut it out, but make sure to leave that V shaped area on top as one piece.

Only color the bottom handle of the flashlight.

Leave the top part alone, because that is going to be the light that comes out when you turn the flashlight on!

Step 3:

Open the Ziploc bag and slip the top part of the flashlight on top of the black paper.

Move it back and forth and watch how the flashlight "lights" up under the sea so you can see all of you sea creatures.

When you're done playing, put the flashlight into the Ziploc bag and close it. Then, you can always visit your secret sea aquarium and use your flashlight to see your sea friends!

Let's see your masterpiece! ☺
